## EDUCATION

---

**Texas A&M University**, College Station, TX - *Computer Science Major*

- August 2021 - Present
- Graduation May 2025

## SKILLS

---

### Programming/Markup Languages

- Python | Javascript | C++ | Java | R | LaTeX | HTML | CSS | Markdown | SQL

### Software Proficiency

- Git | VSCode | Docker | Audacity | Krita | Musescore | Gimp | Node

Windows | Linux/Unix

2D Animation

## PROJECTS

---

### Discord Bot

- Bot created using the discord.py API used for fun and server management
- Actively developed and maintained with usage of GitHub projects

### TAMU SHPE App

- Mobile app created with React-Native using Expo
- Utilizes firebase for the back-end
- This is my first project I have worked on that uses typescript and it has expanded my horizons on what I thought was possible with node.js packages.

### Youtube Frame Ripper

- Tool that utilizes node.js libraries in order to convert a YouTube video into text-art

### Web Application

- Simple web application built with the node.js. Uses Express and a MongoDB cluster
- Allows users to make posts and view them on a large collage

## Events/Organizations

---

### Defcon 2021 - Security Conference

- Attended conferences about a multitude of topics including
  - Password Cracking, Apple Air Tag security risks, Analyzing Satellite signals, etc
- Participated in a badge hacking CTF

### TAMUHack 2021 - Single day Hackathon

- Competed in a CTF against 25+ teams
- Developed the front-end of a small project

### Aggie Coding Club - TAMU General Coding Organization

- Attend workshops and various tech company talks

## Work Experience

---

### Pinballz Arcade, Research Boulevard, Austin, TX - *Floor Attendant*

- June-August 2021
- Worked with and operated various attractions and provided excellent customer service
- Assessed broken machines and reported technical issues
